

Full Field Electretinography (ffERG) Multi-Luminance Flicker

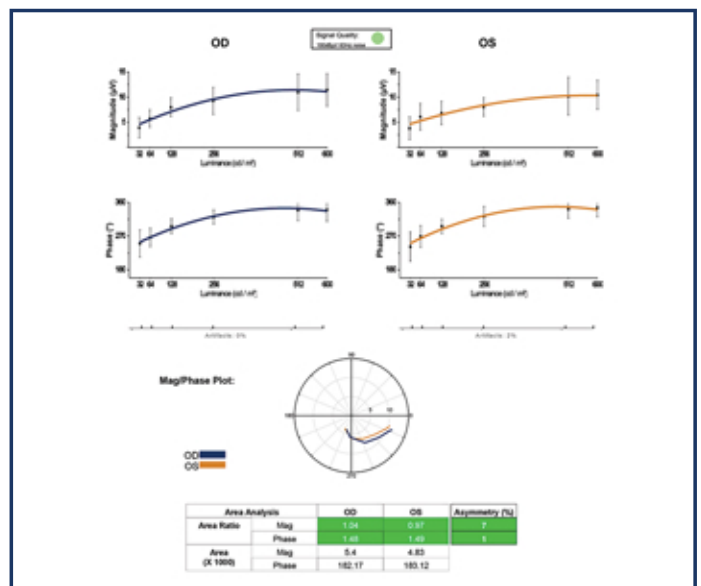

Objective Measurement of Retinal Function

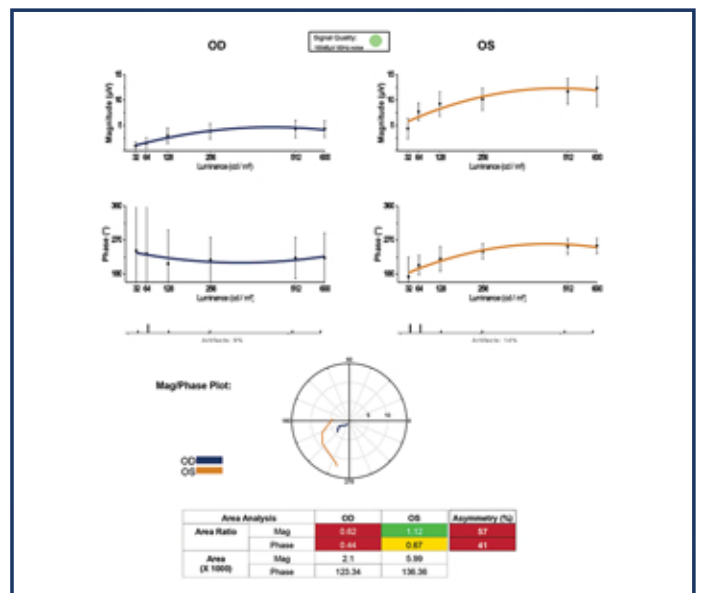

- Results help track changes in retinal function, even in the presence of media opacities.^{1,2}
- Reports and documents the results of treatment and disease progression for enhanced patient management.
- No verbal response or “button pushing” by patients.

Diabetic Macular Edema

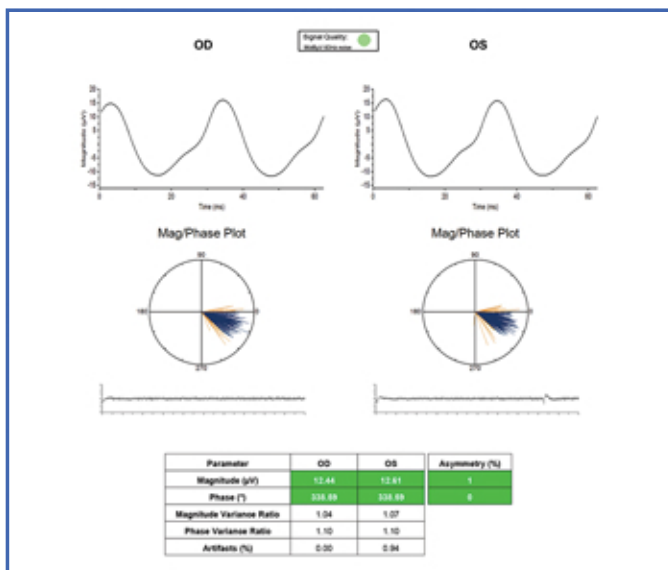

Full Field Electroretinography (ffERG)

Fixed Luminance Flicker

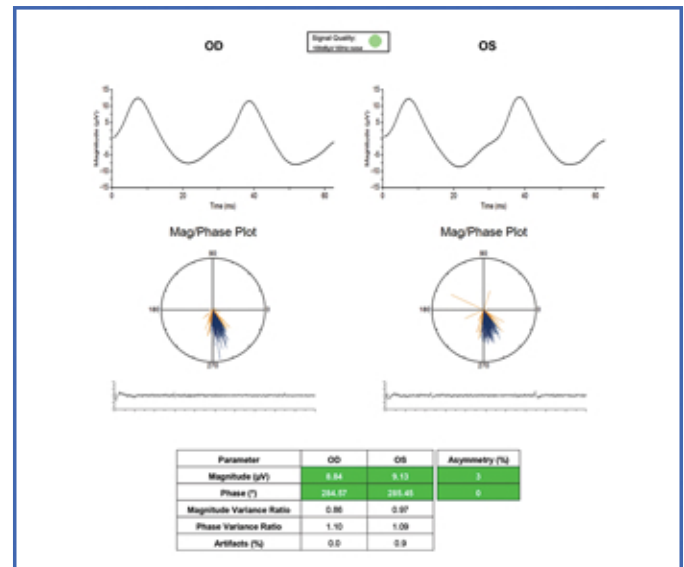

Better Management of Cataract Patients with Retinopathies

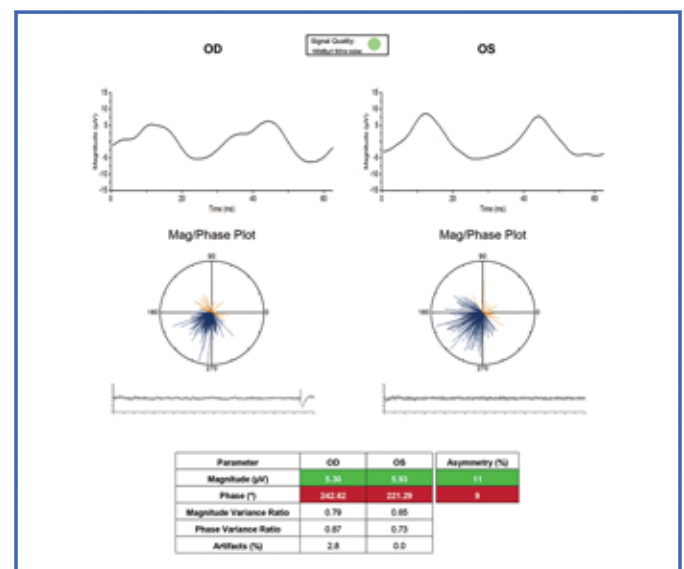

- Results help measure the effect of retinopathies on vision through the presence of dense opacities.^{1,2}
- Data helps eye care providers better manage patient expectations for IOL procedures.
- Documents the results of practitioner intervention for enhanced disease management.
